

DAVIS MOUNTAINS FITNESS AND TRAINING CAMP

CAMP CYCLING

Hello Bikers,

This letter is about bike stuff. Please read it, especially if you are a first time camper and cyclist.

Make sure your bike is in good working condition before camp. Check that all gears and the brakes are working well. It's particularly important thing to check your tires. If they have cracks in the rubber or the sidewalls are fraying, it is probably time to replace them. Worn tires can blow out at any time.

As all you veterans know, there is only one bike shop in the area—30 miles away in Alpine [[Bike Man, 602 West Holland Avenue, \(432\) 837-5050](#)]

Please bring several extra tubes, and a patch kit. TXDOT often mows the roadsides right before we get there, and there are bushes that have big thorns along the road. If they mow, we get lots of flats...

Camp is at high altitude, which means a very dry climate. It is a good idea to carry two water bottles on rides. There are planned water stops on the rides, but you do not want to run out.

See You at Camp-
Mark Weidner, DMFTC Bike Leader
